Project Guidelines

1. Every team should consist of 4 members. Fill this information in the excel sheet ("Team Details" available on Nalanda)
2. Please prepare 1 page abstract describing the software prototype which you want to implement as part of this course. You can show a conceptual diagram and talk about the most important features which the application would support.
3. This file should contain the team number and list all the team members. Rename the file as TeamNo.pdf (Team05.pdf) and submit it on Nalanda.
4. **Abstract Submission Deadline → 25th August 11:55 PM**. Extension of deadline would not be permitted.
5. The final submission would consist of three items:
    a. Source Code
    b. Video
    c. Documentation
    d. PPT + Q&A
6. **Source Code:** Please create a git repository and commit all developed code to the repo. The git repo must be public so that I can access the code base. Please include the git URL in the documentation.
7. Video: Create a video/screencast of 2-3 minutes showcasing the entire process of compiling and deployment of your application. Please also explain the important features of your application. You can/should use voice over to explain all the details.
8. Documentation: The First page of the documentation should list all the members, and their contributions made to the project + URL of the GIT repo. Please include the designing of informal specifications, semi-formal specifications and formal specifications using SRS document, decision table and algebraic specifications. Also include DFD modelling, Activity Network, Work Breakdown Structure and PERT charts. In addition, you must design the test cases corresponding to the working prototype of your project.
9. Create a zip and name it as TeamNo.zip consisting of video and documentation and submit it on Nalanda
10. **Final Submission Deadline → 11th November, 11:55 PM. Extension of deadline would not be permitted.**
11. **Grades would be announced by 25th November. There is no individual grading. It would be a team-based grading. Grading would be relative.**
